Package name: com.facebook.lite Version: 231.0.0.5.122 (264429328) File size: 1.5 MB Updated: December 31, 2020 Minimum Android version: Android 4.0.3 (Ice Cream Sandwich, API 15) Screen DPI: nodpi Architecture: armeabi-v7a MD5: fdb430540bb1a1f6eadc6864fd66c828 SHA1: b5fc27603bb79ee6338a91469846107e87b65df6 Improvements for Reliability and Reliability Facebook Lite latest APK 230.0.0.4.121 (263384594) is a little version of Facebook working smoothly with low-end phones, regardless of the data connection speed. This slimming program is designed for the whole world, especially the developing countries when Internet connection is still barely available. The size of FB Lite is below 1MB, with fairly 2.80 space in the device. Lite doesn't preload photos like conventional Facebook. The app downloads the photo in low resolution to show, until the photos are typed, it will automatically download the higher resolution. Facebook Lite File Information Last updated: December 24, 2020 Developer: Facebook Version: 230.0.0.4.121 (263384594) Requirement: Android 2.3 and up File Size: 1.7 MB Uploaded: December 24, 2020 at 10:56AM GMT+07 MD5: 18a56de5c732615a771ab8245a63f1 SHA1: a11ab531778e469e59f0d8a6ddc619193aced67b Available on Google Play: Installing from Google Play Facebook Lite app review Facebook Lite for Android appears to be a familiar and intuitive because it's a redesigned app. The features that have plummeted with it aren't much more different from the conventional app. Instead of have a floating button on the right, this information moved the status post bar to the top end of the app. The layout shows a different design, but the order of the basic tabs to type is still the same: News feed, friends requests, messages, notifications, search, and options. The text and buttons are generally greater on this information. It's meant to give the same advanced experience on the phones with low resolution screens. On the notification pane, profile photos are not shown on FB Lite. Instead, it goes for small and low resolution image to inform the users if their posts are commented on, liked or redacted by friends. The designed look is really semi-modern shown by the gray background, combined with blue and white dominating the interface. The absence of the boundary that places between a notification bar and the sides of the screen is what makes this information overcome a little in the eyes. FB Lite has the built-in message feature. There is no power to download the separate app to continue using the message feature on it. To be fair, Lite message feature isn't as interesting as Messenger because it doesn't include message bubbles, timestamps and read receipts. Pros: It's quick to install. This is the space-saving program. This information is efficient with data. It provides better connectivity with poor networks. The interface design needs extra improvement. How to use When you open it for the first time, there will be two options: Sign in or sign in. To, an account will take under five minutes, so will the sign-up. There are no special requirements since it only asks you for basic information such as email or phone numbers. You must confirm the activation on the email you are importing or by the code that the developers send you. After the registration is done, you can choose what you want to do on News Feed, Friends Requests, Messages, Notifications, Search, and Options. If you want to place a status, click the box under the Feature Pane. Make it with the photos, highlighted friends, specific activities and feelings. The logout button is available under option function.
